50 ways the West Midlands has made its mark
Social media - 50 ways the West Midlands has made its mark

From the invention of the steam engine in the 18th century and the self-adhesive stamp in the 1960s, to the UK’s first multi-city testbed for 5G technology – the West Midlands has remained at the forefront of industry for centuries.

We have produced a collection of 50 facts that showcases the region’s contribution to the world.

We want you to help us tell this story, so have created a range of GIF’s, images and a document detailing the full 50 ways the West Midlands has made its mark. These assets can be found on the West Midlands toolkit.

You can download the images and GIFs to use with the examples detailed on the following pages, feel free to use the assets with your own social media activity and use #50waysWM. Together we can let the world know how the West Midlands has made its mark.

For more information regarding 50 ways visit makeitwm.com, a new website to showcase the best of the region including accommodation, food and drink, sport and tourism attractions.

The world’s oldest digital computer.
And the UK’s first 5G testbed.
The West Midlands stands at the forefront of innovation.

#50waysWM | #WMGrowth

In 1951, Birmingham-born mathematician and computer scientist Conway Berners-Lee unveiled the first commercially-available electronic computer.

The world’s oldest original digital computer is the WITCH (Wolverhampton Instrument for Teaching Computing from Harwell), which was used at the University of Wolverhampton in the 1950s.

Now, the West Midlands leads the 5G revolution. We have launched the UK’s first large-scale testbed.
